Diabetes Resource Guide

Provided by the Wisconsin Diabetes Prevention and Control Program

Diabetes in Wisconsin

Diabetes is a serious, common, costly, but controllable chronic disease. In Wisconsin:

- Diabetes was the sixth leading cause of death in 2000
- It is estimated that about 330,000 persons in Wisconsin have diabetes (diagnosed and undiagnosed)
- In 2000, over 1,300 residents died when diabetes was listed as the underlying cause of death
- In 2000, there were 78,790 diabetes-related hospitalizations
- In 2000, there were over 1,700 diabetes-related amputations

Annually, diabetes and its complications cost an estimated \$2.8 billion in health care and lost productivity. Many of these adverse outcomes can be prevented, or at least delayed, by an aggressive program of more preventive care, prompt identification of problems, early intervention and treatment.

Purpose of the Guide

One method to help improve diabetes care and delay or reduce diabetes-related complications, is to provide current diabetes educational and resource information to health care providers and people with diabetes. The purpose of this guide is to provide a listing of organizations, government agencies, programs, financial resources, and internet resources in one easy-to-use guide.

The Diabetes Resource Guide's audience is:

- Health care organizations
- Health care professionals
- People with diabetes
- Family & friends of those with diabetes
- People at-risk for developing diabetes

About the Wisconsin Diabetes Prevention and Control Program

The mission of the Diabetes Prevention and Control Program (DPCP) is to improve diabetes care in Wisconsin. Forming and maintaining strong, active partnerships are key to achieving this mission. The DPCP uses a statewide approach to improve diabetes care through:

- Working with health systems
- Designing population-based community interventions and health communications
- Outreach to high risk populations
- Conducting surveillance and evaluation of the burden of diabetes
- Coordination of efforts through the Diabetes Advisory Group

The Diabetes Advisory Group, convened by the DPCP, provides the foundation for active partnerships across the state. Members include over 60 diverse partners, including health care and professional organizations, minority groups, business coalitions, insurance and managed care organizations, voluntary and community-based organizations, academic centers, industry and public health representatives, and consumers. **(See Appendix A for a listing of members).**

The DPCP provides a number of printed resource materials as well as links to additional information. See page 18 for resource and contact information.

Copies and Updates

Every attempt is made at the time of printing to include the most current information; however, contact information and internet addresses frequently change. Please notify us, using the contact information listed below, if you notice any incorrect information or wish to add a valuable resource to our next revision. To obtain additional copies of the Diabetes Resource Guide call 608-261-6855, email wingja@dhfs.state.wi.us or download at www.dhfs.state.wi.us/health/diabetes/index.htm.

American Diabetes Association (ADA)

ADA is a professional association and a private, nonprofit, voluntary organization with state and local offices. The mission of this organization is to prevent and cure diabetes, and to improve the lives of all people affected by diabetes. To fulfill this mission, the American Diabetes Association funds research, publishes scientific findings, and provides information and other services to people with diabetes, their families, health care professionals and the public.

ADA publishes a monthly magazine for patients called *Diabetes Forecast* and a bimonthly publication called *Diabetes Advisor*.

Additionally, ADA publishes cookbooks, meal planning guides, books, brochures, and pamphlets for patients, their families, health professionals, and other interested consumers.

Professional journals focusing on basic and clinical research are published including *Clinical Diabetes*, *Diabetes*, *Diabetes Care*, *Diabetes Spectrum*, and *Diabetes Reviews*. ADA also publishes a variety of other medical management guides, including clinical practice recommendations.

**The American Dietetic Association
Diabetes Care & Education (DCE) Dietetic Practice Group**

The American Dietetic Association is an organization for registered dietitians and other professionals providing nutrition care and education services. The association publishes the monthly *Journal of the American Dietetic Association*.

The DCE Practice Group develops guidelines for the nutritional management of diabetes, and maintains a network of practicing dietitians available for consultation. The DCE Practice Group publishes two newsletters, *Newsflash* and *On the Cutting Edge*. Other materials available for professionals from the Association include review papers and bibliographic resources in the areas of diabetes and nutrition, guidelines, manuals, and kits. For patients there are a variety of brochures related to healthy eating and meal planning.

MetaStar—Diabetes Quality Improvement Project

MetaStar is a health care quality improvement organization based in Madison, Wisconsin. MetaStar helps to assure cost-effective, quality health care through projects with health care organizations involving quality improvement, data analysis, and cost containment.

MetaStar will work together with healthcare systems and clinics to improve care for their patients with diabetes. The current diabetes quality improvement project involves three indicators, including appropriate frequency of retinal exam by an eye professional, appropriate HbA1c testing, and appropriate frequency of lipid profile. As part of the project, MetaStar will provide resources (tools, data) and consultation to enhance efforts of providers and plans to gather systematic information on patients.

MUMS: National Parent-to-Parent Network

MUMS is a national Parent-to-Parent organization for parents or care providers of a child with any disability or health condition. MUMS' main purpose is to provide support to parents in the form of a networking system that matches them with other parents whose children have the same or similar condition. Parents can then exchange valuable information and provide each other with emotional support.

MUMS also connects parents with support groups dealing with their child's specific disability or assists them in forming a group. A newsletter, *The Matchmaker*, is published quarterly and allows families to share and speak out about issues affecting their lives.

Division of Diabetes Translation, Centers for Disease Control and Prevention (CDC)

An agency of the Public Health Service, Department of Health and Human Services, CDC promotes assessment, health policy development, assurance of quality health services, and implementation of community-based approaches to reduce the burden of diabetes in the U.S.

The agency supports diabetes control programs in all 50 states and four territories, conducts surveillance and research, and is a sponsor of the National Diabetes Education Program. CDC distributes several publications including an annual surveillance report; a patient guide, *Take Charge of Your Diabetes* (available in English and Spanish); fact sheets; a guide for primary care providers; and annotated bibliographies reviewing current literature on economic issues and diabetes.

Diabetes Prevention Program

The Diabetes Prevention Program (DPP) was the first nationwide research study designed to find out whether Type 2 diabetes can be prevented through diet and exercise, or medication. The DPP study is sponsored by the National Institute of Diabetes and Digestive and Kidney Diseases (part of the National Institutes of Health) and was administered at 27 medical centers across the country. In addition to information on the study and the results, fact sheets of diabetes information for specific populations and statistical summaries are available from the website.

National Diabetes Education Initiative (NDEI)

The NDEI is an online, multi-component educational program on type 2 diabetes designed for healthcare professionals. The NDEI develops programs that address the spectrum of type 2 diabetes, including its epidemiology and pathophysiology as well as therapeutic options and prevention. NDEI also provides healthcare professionals with updated diabetes data and research information through a variety of media and offers seminars and conferences.

National Diabetes Education Initiative
www.ndei.org

National Diabetes Education Program (NDEP)

The NDEP is a joint initiative sponsored by the National Institute of Diabetes, Digestive and Kidney Diseases (NIDDK) of the National Institutes of Health (NIH) and the Centers for Disease Control and Prevention (CDC) that involves public and private partners. The program's purpose is to improve the treatment and

outcomes for people with diabetes, to promote early diagnosis, and ultimately to prevent the onset of diabetes.

A wide variety of materials are offered for both patients and health professionals, many are also available in Spanish. Materials and media kits are also available for organizations wishing to join the campaign, and a special package of materials is available for businesses. Among the newest materials developed are for the Diabetes Prevention Campaign: *Small Steps. Big Rewards. Prevent Type 2 Diabetes* and resources on diabetes in children and adolescents.

Weight-control Information Network (WIN)

The Weight-control Information Network (WIN) is a national information service of the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), National Institutes of Health (NIH). WIN was established in 1994 to provide health professionals and consumers with science-based information on obesity, weight control, and nutrition.

Materials available include fact sheets, brochures, reprints, conference and workshop proceedings, and lecture videos. WIN's newsletter, *WIN Notes*, is published quarterly and provides health professionals with the latest research findings and progress about the WIN program. WIN also has a media based program targeting African American women.

BadgerCare

BadgerCare is Wisconsin's state program to provide health insurance for uninsured working families, managed by the Division of Healthcare Financing, Department of Health & Family Services. The program insures both children and their parents and is intended to fill gaps between Medicaid and private health insurance. To be eligible one must have children under age 19 living with them, their income must be within the guideline limits, and they cannot be covered by other health insurance.

Directory of Prescription Drug Patient Assistance Programs

To make it easier for physicians to identify the growing number of programs available for needy patients, member companies of the Pharmaceutical Research and Manufacturers of America (PhRMA) created this directory. It lists company programs that provide drugs to physicians whose patients could not otherwise afford them. Only companies who are members of PhRMA are listed.

Information is available about each program from PhRMA's website. A copy of the directory, in Adobe Acrobat format, can also be downloaded and printed.

Directory of Prescription Drug Patient Assistance Programs

Eye Care America's Diabetes EyeCare Program (DEP) NEW ADDITION!

The Diabetes EyeCare Program (DEP) is a service of Eye Care America, the Foundation of the American Academy of Ophthalmology. The DEP promotes annual, dilated eye exams for people with diabetes. DEP raises awareness about diabetic eye disease, including diabetic retinopathy, provides free diabetic eye disease educational materials and facilitates access to eye care. People eligible for a referral through the program receive a comprehensive, medical eye exam and up to one year of treatment—at no out-of-pocket expense—for any condition diagnosed during the initial exam. Volunteer ophthalmologists accept Medicare and/or other insurance reimbursement as payment in full.

Nonprofit Warehouse NEW ADDITION!

Nonprofit Warehouse.com is an online service that provides products for nonprofit organizations. Their goal is to bring non-profit manufacturers and selected low cost suppliers together with nonprofit organizations in a common place for the mutual benefit of the people they serve.

Included among a variety of products and programs is the free **Prescription Drug Discount Card**. The Card is available for free to any organization, government agency, religious organization, or commercial support organization for distribution to any individual that does not have a prescription drug benefit. There are no age or income restrictions and no registration requirements. With the Card a person will be able to purchase their prescriptions at or below wholesale prices at any Kmart Pharmacy. There is also a mail order program available for individuals who do not have a Kmart Pharmacy located near them.

Continued on next page...

The card can be printed directly from their website and photocopied, if needed.

Orange Card from GlaxoSmithKline NEW ADDITION!

The Orange Card is a discount prescription drug card offered by GlaxoSmithKline to help seniors and other Medicare eligible with limited incomes. Participants will realize an average savings of 30% off the usual price they pay for outpatient GlaxoSmithKline medicines. Eligible participants must be a senior or other person eligible for Medicare; have an annual income at or below 300% of federal poverty levels; and must have no private or public insurance coverage for prescription medicines.

Orange Card from GlaxoSmithKline
Toll free: 1-888-672-6436

RxAssist NEW ADDITION!

RxAssist provides physicians and other health care providers with the information they need to access patient assistance programs offered through pharmaceutical manufacturers. Providers can search programs by company, brand name, generic name, and drug class. Downloadable information is also available for patients describing options for prescription assistance. The site also links to State programs and drug discount card programs.

RxAssist
www.rxassist.org

Share Cardä Program from Pfizer NEW ADDITION!

The Share Care Program is a drug benefit program for low income Medicare patients. The Program offers three benefits including (1) \$15 prescriptions for each Pfizer prescription (up to a

30 day supply); (2) health information; and (3) toll-free live assistance. There is no fee to apply for the Program but applicants must meet the following criteria: (1) be enrolled in Medicare (2) have no prescription drug coverage (3) have an annual gross income of less than \$18,000 per individual; \$24,000 per couple.

Share Card Program from Pfizer

Wisconsin SeniorCare NEW ADDITION!

Managed by the Division of Healthcare Financing, Department of Health & Family Services, SeniorCare is Wisconsin's prescription drug assistance program for Wisconsin residents who are 65 years of age or older and who meet eligibility requirements. Eligibility requirements include: (1) must be a Wisconsin resident; (2) must be 65 years of age or older; (3) must pay a \$20 annual enrollment fee per person; (4) only income is measured (assets, such as bank accounts, insurance policies, home property, etc., are not counted). Individuals with prescription drug coverage under other plans will be eligible to enroll, but SeniorCare will only cover eligible costs not covered under other plans. Individuals enrolled in Medicaid are not eligible.

All seniors will be subject to certain out-of-pocket expense requirements depending on their annual income. There are different expense requirements and benefits based on the senior's income and their spouse's income, if the couple lives together.

Wisconsin Chronic Disease Program

Managed by the Division of Healthcare Financing, Department of Health & Family Services, the Wisconsin Chronic Disease Program (WCDP) offers assistance to Wisconsin residents with chronic renal disease, hemophilia and adult cystic fibrosis. The WCDP is funded entirely by state dollars. The program pays health care providers for disease related services and supplies provided to certified Wisconsin Chronic Disease Program recipients after all other sources of payment have been exhausted.

Chronic Disease Program recipients are responsible for certain co-payments and annual deductibles determined by the program. Recipients whose annual income exceeds 300% of the federal poverty level must pay a certain percent of out-of-pocket expense before becoming eligible to receive WCDP benefits. The state seeks repayment of WCDP benefits provided to recipients under the Estate Recovery Program.
